

E-SBSL

E-SIGNATURE BASED SECURITY LIBRARY AND SERVICES

ONE SECURITY DEVICE TO RULE THEM ALL.

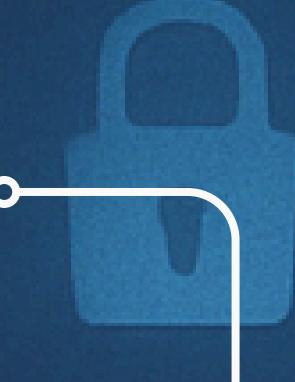

E-SBSL is a next-generation security ecosystem built on the power of e-signature devices. It replaces fragile passwords, insecure file sharing, and untrusted communication with cryptographic certainty – directly in your hands. From signing and encrypting documents, to sending secure emails, managing credentials, and verifying identity – everything is protected by the one thing that can't be faked: you.

No leaks. No guesswork. Just trust, end-to-end.

FILE SIGNING

Signing all kinds of files and verification of signature

FILE ENCRYPTION

Encrypting and decrypting all kinds of files

PDF SIGNING

PDF signing that fits ETSI-PADES standards. Can be verified with Adobe!
